## MOONDROP MIAD01

\$399

The growing complexity of 5G smartphones and the disappearance of the headphone jack are taken for granted by most users, but for people who love music and value sound quality, these developments are problematic.

Music lovers long for a solution that doesn't involve carrying a cumbersome hi-fi player around, or connecting their smartphones to external decoders and amplifiers.

A solution that returns to the original vision of a hi-fi player that allows you to "Take beautiful sounds with you."

 5G Networks

 5000mAh battery

 6.7inch OLED Curved Screen

 7050 8-core processor

 Ultra large memory  
(LPDDR4x 12G)

 Supports 2TB storage
